Ah Young Kim

Senior UX Designer | San Francisco, CA | ahyoungk.com | ayk9531@gmail.com | LinkedIn

SUMMARY

Senior UX and interaction designer with a product management background and 5+ years in product and UX, designing commerce and promotional experiences for Galaxy devices across Samsung.com (desktop and mobile web) and the Samsung Shop App. Takes work from early concepts through live experiments and launch, prototypes rapidly with AI tools, and grounds design decisions in user research and business data.

EXPERIENCE

Senior UX Designer | Samsung Electronics *Aug 2023 – Present*

- Lead end-to-end UX for Samsung's flagship phone buy pages, a $875M+ product line, across 12 launches including Galaxy S24–S26, Z Fold5–8, Z Flip5–8, and Galaxy XR, evolving shared components and interaction patterns so every launch ships consistently across desktop and mobile web.
- Led design of the Galaxy XR purchase journey, from buy page through demo booking, for Samsung's first Android XR headset: prototyped competing layouts, validated them in a 30-participant usability study, and settled the direction with an A/B test that lifted gallery-to-checkout 49% and click-through 13%.
- Redesigned the Galaxy Watch8 configuration step using heuristic evaluation, site analytics, and NPS insights, creating a simpler selection flow that lifted conversion 27% and cut band-selection drop-off 42%.
- Partner with content and advertising teams to design how campaign creative, offers, and promotional messaging appear across flagship buy pages, balancing promotion against a clear path to purchase.
- Collaborate with PMs, engineers, and UX researchers from wireframes through high-fidelity prototypes and launch; present design rationale to senior leadership in the US and Korea.

Product Manager | Samsung Electronics *Aug 2021 – Jul 2023*

- Defined the direction for the Samsung Shop App redesign and designed key flows across navigation, product pages, and checkout, doubling app revenue year over year and lifting conversion 50%.
- Launched Samsung's first AI-powered recommendation engine (+30% conversion) and lifted push notification conversion 50% with personalized in-app messaging.
- Led go-to-market and buy page strategy for Galaxy S22, Z Fold4, Z Flip4, and Watch5 launches, aligning design, engineering, and marketing.

Product Intern | Samsung Electronics *May 2021 – Jul 2021*

- Designed product comparison, navigation, and personalization features for the Samsung Shop App.
- Won first place in an intern competition with a Gen Z campaign converting iPhone users to Galaxy Z Flip.

EDUCATION

New York University, Tandon School of Engineering *May 2021*

Master of Science, Integrated Design & Media

University of California, Berkeley *May 2018*

Bachelor of Arts, Psychology and Education

SKILLS

Interaction design: User flows · Wireframes · High-fidelity prototyping · Design systems · Mockups

AI: AI prototyping (Claude, Figma Make) · AI/ML-powered features · Generative AI for design exploration

Research: Usability testing · A/B testing & live experiments · Site analytics · Conversion optimization

Platforms & tools: Desktop & mobile web · Mobile app · Android XR · Figma
